PROFILE

Senior Flutter Developer with 5+ years of experience in building scalable, high-performance mobile applications. Led cross-functional teams to develop apps deployed to 50K+ users. Expertise in Flutter, Firebase, REST APIs, and CI/CD pipelines for seamless deployment. Passionate about delivering seamless, high-impact user experiences that scale.

EXPERIENCE

Da-Manager Megadrive Solutions Limited **2021 - Present**
Intern - Web Designer & Mobile Developer *Warri, Delta State*

- Created and manage Da-Manager's website using Figma for design and Firebase hosting, ensuring 99.9% uptime and streamlined content updates under senior supervision
- Collaborated within a 6-person Agile team to deliver client websites, contributing UI designs in Figma and integrating REST APIs, which reduced development time by 15%
- Designed brand-consistent website templates in Figma with responsive layouts and reusable components, accelerating new project kickoff by two weeks
- Developed multiple Flutter mobile apps integrating Firebase Auth, Firestore, and WebSockets for real-time engagement, resulting in a 20% increase in user retention

Mothership Africa **2022 - 2022**
Mobile Developer *Lekki, Lagos, Nigeria*

- Designed and managed the Mothership Africa mobile app with Flutter using MVVM architecture, integrating multi-language localization and Git version control, which created a modular codebase and allowed faster feature updates
- Implemented light and dark mode themes in Flutter, letting users switch appearance, which increased user satisfaction and lowered support queries
- Suggested UI/UX improvements such as clearer navigation and consistent iconography, leading to smoother rollouts and higher user retention
- Deployed the Android version of the app to the Google Play Store, handling signing and release notes, which resulted in a successful launch and positive user reviews

RTech Diagnostics **Jan 2022 - 2022**
Mobile Developer *Texas, USA*

- Architected and deployed 4 Flutter-based healthcare apps, reducing user-reported bugs by 35% and improving feature rollout speed by 50%.
- Spearheaded the development of 4 Flutter-based healthcare apps, increasing client acquisition by 25%.
- Implemented multi-language support in the apps using Flutter's intl package, which boosted user engagement by 40%
- Conducted code refactoring across the codebase with Provider and Riverpod patterns, lowering bug reports by 35%
- Deployed Android and iOS versions of RTech Diagnostics apps via CI/CD pipelines in GitHub Actions, expanding platform coverage and increasing user downloads

EventPadi **2023 - Present**
Lead Mobile Developer *Maryland, Lagos, Nigeria*

- Defined technical requirements for a dual-sided event marketplace, collaborating with product and design teams in Agile sprints and documenting specs in Confluence, which enabled secure payment integration and set the foundation for on-time delivery
- Built ticket registration and automated QR-code generation using Kotlin and Swift with MVVM architecture, syncing data via REST APIs and CI/CD pipelines, resulting in a faster checkout flow and smoother cross-platform experience
- Performed iterative UI/UX audits in Figma and Adobe XD to reduce discovery-to-purchase drop-offs.
- Launched on Android and iOS with Google Analytics-driven conversion tracking.

Autofixr **Jan 2023 - 2023**
Senior Mobile Developer *Maryland, Lagos, Nigeria*

- Researched and designed location-based nearby repair services using the Google Maps API, enabling users to locate the closest provider quickly
- Developed provider directories and appointment scheduling in Flutter with automated push reminders, increasing completed bookings by keeping users informed
- Optimized backend APIs to reduce data usage by 30% for low-connectivity users.
- Refined service validation workflows after launch by incorporating provider feedback loops, improving validation accuracy and reducing errors

Conference360 **2023 - 2025**
Lead Mobile Developer *Lekki, Lagos, Nigeria*

- Designed B2B networking modules in Flutter using MVC architecture and Dart, enabling sponsors to be discovered and schedule 1-on-1 meetings, which increased sponsor engagement during the conference
- Implemented secure post-event content access with WordPress authentication and a Flutter front-end, allowing attendees to view session replays and download certificates, improving post-event satisfaction
- Load-tested interactive exhibition maps to ensure smooth performance on mid-range devices.
- Documented architecture and APIs for seamless team handover and future reuse.

The Ofala Onitsha App **2023 - 2023**
Lead Mobile Developer *Onitsha, Anambra, Nigeria*

- Digitized traditional programs with cultural showcase galleries highlighting regional heritage.
- Developed a custom ticketing system and real-time scheduling feature with Dart and WebSockets, supporting up to 5,000 concurrent users at outdoor festivals and cutting ticket-processing time by 40%
- Migrated and optimized extensive media archives for fast mobile performance.
- Monitored live event data feeds to deliver real-time parade and performance updates.

The Omniverse Summit App **Jan 2025 - Oct 2025**
Senior Mobile Developer *Lekki, Lagos, Nigeria*

- Collaborated with stakeholders using user-story mapping and Swift MVVM architecture to define attendee journeys for registration and live-session engagement, resulting in a clearer flow that reduced onboarding time
- Engineered QR-based entry, real-time WebSocket Q&A, and polling features in Swift, supporting thousands of concurrent users and enabling seamless session interaction, which increased attendee participation
- Managed a 100+ user closed beta to stress-test personalized agendas with zero live-event downtime.
- Provided on-site technical oversight and deployed real-time hotfixes with Git and Xcode during the summit, quickly resolving issues and maintaining uninterrupted attendee experience

Dreacot Delivery (Logistics & Delivery Platform) **Aug 2024 - Jan 2026**
Mobile Developer *Lekki, Lagos, Nigeria*

- Architected an end-to-end on-demand delivery system connecting vendors, riders, and customers in real time.
- Implemented live GPS tracking, dynamic order assignment, and route optimization for efficient dispatching.
- Integrated secure payment gateways and wallet systems for seamless checkout experiences.
- Optimized backend performance and push notification workflows to support rapid order scaling.
-

SELECTED ENGINEERING PROJECTS

Event Technology Ecosystem (Multi-App Architecture) **2023**
https://play.google.com/store/apps/developer?id=Membscribe
Eventpadi Technologies *Lagos, Nigeria*

- Built and deployed multiple scalable event platforms including:
- African Social Impact Summit
- Conference360
- The Omniverse Summit App
- The Ofala Onitsha App
- EventPadi
- QR-based accreditation & ticket validation
- WebSocket-powered live Q&A and polling
- Dual-sided marketplace architecture
- Real-time agenda updates
- Sponsor visibility dashboards
- Zero-downtime live event support
- Google Analytics-driven conversion tracking

Logistics & On-Demand Systems – Dreacot Delivery **Aug 2024 - Jan 2026**
https://play.google.com/store/apps/developer?id=Dreacot+Digital+Limited
Dreacot Limited *Lagos, Nigeria*

- End-to-end delivery infrastructure connecting vendors, riders, and customers.
- Live GPS tracking & route optimization
- Dynamic rider assignment system
- Secure wallet & payment integration

- Scalable push notification workflows
- Backend performance optimization for rapid order growth

Healthcare Platforms (US-Based Clients) **Jan 2023 - Jun 2032**
RTech Diagnostics Limited *Texas, United States*

- Architected and deployed 4 production healthcare apps.
- 35% reduction in bug reports after refactoring
- 50% faster feature rollouts
- Multi-language support increasing engagement by 40%
- Cross-platform Android & iOS releases

TECHNICAL SKILLS

- **Skills**: Flutter, Dart, Java, Swift, Firebase, Kotlin, WordPress, MVVM, MVC, Agile, Figma, Android Studio, Rest API, CI/CD, XCode, Arduino, Github, Python
- **Mobile Engineering**: Flutter (advanced), Dart, MVVM & MVC architecture, State management (Provider, Riverpod, Bloc), Native integrations (Kotlin, Swift), Android Studio, Xcode
- **Backend & Cloud**: Firebase (Auth, Firestore, Cloud Functions, FCM), REST API integration & design, WebSockets (real-time engagement systems), Secure payment gateway integrations, CI/CD pipelines & Play Store/App Store deployment
- **System Capabilities**: Real-time GPS tracking & dynamic dispatch systems, QR-based access control & ticketing systems, Multi-language localization, Performance optimization (reduced API payloads by 30%+), Code refactoring & bug reduction (35%+ improvement), Load testing & live production support
- **Tools**: Git, GitHub, Figma, Adobe XD, Arduino, Python

EDUCATION

Federal University of Petroleum Resources (FUPRE) **2020 - 2023**
Bachelor of Science(BSC) *Warri, Delta State, Nigeria*

Flutter Development Bootcamp with Dart **2021**
Certificate of training *Warri, Delta State, Nigeria*

Oseke Academy **2019**
Embedded System Developer *Warri, Delta State, Nigeria*
